Weekly, per year.....	6.50

The New Mexican is the oldest newspaper in New Mexico. It is sent to every Postoffice in the territory, and is a growing and progressive people of the southwest.

## ADVERTISING RATES.

Wanted—One cent a word each insertion. Local—Ten cents per line each insertion. Reading Local—Preferred position—Twenty-five cents per line each insertion. Displayed—Two dollars an inch, single column, per month in Daily. One dollar an inch, single column, in either English or Spanish Weekly. Additional prices and particulars given on receipt of copy of matter to be inserted.

SATURDAY, APRIL 30.

"Tramp, tramp, the boys are marching," to free an oppressed people. No nobler service can be rendered by man to man.

FRANCE may have an idea that now is the time to speak in thunder tones to Uncle Sam concerning the Monroe doctrine, but "she'll be sorry that she said it" if she does.

NEW MEXICO goes right on in the work of improving the great natural resources of the territory, despite war and war talk. A good country is like a good man, it can't be kept down.

SOME judicious advertising in the east and north at the present time will prove a paying investment for the people of New Mexico. It will not cost a great deal to try the experiment anyway.

GOVERNOR OTERO, in securing a change in the order to recruit the volunteers at some other point than Santa Fe, was actuated by no selfish motive. He acted in the interest of the country and that fact will be appreciated before many weeks roll by.

THERE is much anxiety over the possibility of other foreign nations taking part in the war between the United States and Spain, but there is no fear. Should complications arise that would require years of fighting or a surrender of liberties, every man able to pull a trigger would enlist. There are a great many red-headed men in America, and those who have hair of a different color can get red-headed if occasion requires.

THE New Mexico volunteers will march to the front bearing a banner that will mean much to them. Every time its folds wave in the breeze it will remind them that the loved ones at home are thinking of them and praying for their safe return; every time it leads them into battle they will be reminded that New Mexico expects every man to do his duty, and to return it to the capital of the territory unsullied by either cowardice or wrong to the helpless. A more fitting gift could not be made to the men who are willing to risk their lives for the honor of homes and native lands.

UNTIL the railroad systems of the southwest are materially altered there will be no place in New Mexico where troops can be concentrated or that can form a central point for rapid operations except Santa Fe, because it is the only point in the whole southwest which is reached by both the broad gauge and narrow gauge railway systems. Every point in this section of country can be reached from Santa Fe without change of cars, on which ever system it is, and this is true of no other place. Men can be sent direct to Fort Wingate on the broad gauge or to the Ute reservation on the narrow gauge. Troops can come from San Juan, Taos and Rio Arriba on the latter and from one to the other. If on the contrary the point of concentration was made at Espanola, all troops from the south and east would have to change from broad to narrow cars at Santa Fe, or if Las Vegas, Albuquerque or Socorro were selected, those from the north and west would have to change at Santa Fe from the narrow gauge system to broad gauge. It is a little singular that there should be no point but this where the two systems come together, but as it is, it settles the military question, even if the accommodations of Fort Marcy was not argument enough.

## Spent the Summer in New Mexico.

One of the results of the war between the United States and Spain will be to change, in a large measure, the direction of travel of Americans. Heretofore the greatest part of the wealthy classes who live in the east spend their summers either in Europe or at the Atlantic sea shore, but the hostilities will prevent these annual pilgrimages to the lands across the water and for obvious reasons make exposed seaside resorts unpopular, thus the heated term must either be spent at home in the cities and large towns, or at inland places of pleasure, preferably the latter. Naturally the attention of the searchers for a change of scene and rest from labor will turn to the mountains, and to the western mountains at that. And this change in habits and movements handed down in families for generations will be for the benefit of all concerned. A better knowledge of their own country will be gained, and they will learn to love the wilderness of the lofty Rockies, the blueness of western skies; the glorious sunshine of the arid regions will creep into their souls with such a force

that it cannot be driven away. Beauties of scenery and sunset never before dreamed of will take hold of them so all absorbingly that nothing else will satisfy. The saying that "there is no great loss without some small gain" is invariably true, and in this case while the country may suffer losses in wealth and lives through the war, the turning of our people to a better understanding of their own land, will in the end prove a greater gain than the losses otherwise sustained.

As the vacation months approach and the question, "where shall we spend the summer?" comes to be the one requiring an immediate answer, let no one in the east and north forget what New Mexico offers in the way of climate, scenery, health and sport. Nature has provided an abundance of all these under the sunny skies of the oldest settled portion of North America. To the worn-out worker, the invalid, the sight-seer, the eager searcher for antiquities, the sportsman and the careless idler, New Mexico offers an asylum during the summer's heat or the winter's cold that is as near perfection as can be found this side of paradise. These things are not said for the purpose of deceiving those who will be at a loss to decide upon a suitable place to spend a vacation, but are truths which can be verified by a single visit to the territory.

New Mexico lies between the thirty-first and thirty-seventh parallels of latitude, which, were it not for the elevation, would make the temperature uncomfortable warm. The southern portion of the territory has an elevation of 3,500 feet, and from that the height above sea level ranges to 12,000 feet in the mountain ranges. In such a varied mountainous region almost any temperature desired the year round can be found. The air, that of a semi-arid land, is wonderfully pure and bracing, and the sunshine—that is the glory of the territory and the life giving force which brings health and strength to the invalid. When the forces of nature separated the land and water, a natural sanitarium was created of New Mexico, and it is to be hoped that that fact is to be learned by the people of the country, and the blessings of a wise providence will be extended to the thousands who stand in need of them. To the weary workers and the invalids of the north and east the territory offers rest, renewed strength and health.

Long before Columbus set foot on the shores of the new world the valleys and plains of New Mexico were the seat of a civilization which has been the wonder of scientists and explorers; for ages unknown people contended for the possession of the lands and streams; nation after nation of strange beings followed each other in conquest, and today evidences are to be found of the ancient settlements. The cliff dwellers' homes still stand, the old pueblos are the homes of the descendants of the builders, and the antiquarian will find enough of that which is old beyond tradition, yet new to the nineteenth century, to keep him occupied during years of patient research. It is not necessary to go to Egypt or Persia to find ruins and relics of people who have passed from the face of the earth, they can be found in New Mexico, and within easy reach of comfortable hotels and homes.

In the mountain ranges scattered over the territory are to be found game of all kinds, including bear, wild turkey, mountain grouse and other varieties. The mountain streams are full of trout, and the sportsman can find amusement that will delight him. The climate is such that camp life is pleasant all times of the year when game is hunted, and the facilities for equipping a camp with all the comforts of home are unexcelled.

Those who go somewhere when summer comes just to be going can please their bent in all things. The cities and towns are filled with cultured, companionable people ever ready to entertain the stranger; the hotels are the equal of any of those at eastern resorts, and life is as attractive as anywhere else in the world. In addition to the attractions of the life in camp or town is the scenery of mountain and plain, valley and stream, and the habits of European or eastern American resorts will find much to attract and please, with nothing to detract from the full enjoyment of life.

New Mexico possesses the advantage of easy access. The Atchison, Topeka & Santa Fe railway, one of the greatest systems of railroads in the entire country, traverses the territory from the north to the south, with numerous branches running into the mountains; the Denver & Rio Grande affords the means of ingress from the north by the way of Denver, and is undoubtedly the most magnificent scenic line ever built. To other sections stage lines afford communication and transportation over the best roads in the world, and the tourist or healthseeker or searcher for knowledge need have no fear of experiencing discomforts in traveling anywhere in New Mexico.

## NEW MEXICO MINES

Spring Work Opens With Activity and New Developments Giving Satisfactory Results.

## REGULAR SHIPPERS ACTIVE

Practical Miners Bid for Leases on Producing Properties—European and Eastern Capitalists Partial to New Mexico Mining Propositions.

Unexampled activity in territorial mining centers is evidenced this spring. Leases are being sought by miners on all known producers and the results of development are most satisfactory. New Mexican mining properties are received with better favor in European and eastern markets than any western propo-

sitions, and many stupendous deals are being effected each month. Following is a brief resume of important mining operations during the past week.

The K. K. mine at Hillsboro has \$200,000 worth of ore.

The Wood mill at Silver City is running full blast.

Jap Onstott is sinking a shaft on his claim at Cooke.

The Red River smelter has made a bid for the Shoshone ore.

The Queen mine at Elizabethtown is producing some fine ore.

The Hoyle lease on the Romero is producing rich copper ore.

Chicago capitalists are after the Hope-well mine in Lincoln county.

The Schneider tunnel in the La Belle district is now in 90 feet.

The White Oak mine at Cooke is being developed by Kief & Peebles.

Regular shipments are being made from the Inez and Montezuma at Cooke.

The new mill at Faulkner is working day and night on the Tripple mine dump.

Operations on the Columbine property at Red River will be resumed this week.

The Simpson smelter at Copper Flat is running on ore from the old Hanover mine.

The Red Oak mine at Cooke is producing some good ore. The force includes six men.

The Bennett properties in the Black Mountain region are showing some fine ore.

The Texas mine at Central is being equipped with a new steam hoisting plant.

Ore is being shipped from the Empire mine at Elizabethtown to the Hematite mill.

The Ironclad placer in Placer gulch, Red River district, has been sold to C. Abbott.

Good copper prospects have been found in the foothills of the mesa northwest of Mesilla.

A revival of mining operations at Faulkner is evidenced. The new mill is a success.

Wright & Fisher have secured a lease and bond on the Bull of the Woods mine at Hillsboro.

The Kingston smelter has been leased and bonded and operations will be resumed at once.

The Hanover mine at Hanover is producing 50 tons of ore per day with a force of 40 men.

The Albion mill, located six miles northwest of Elizabethtown, will start operations May 1.

Joe Hutchins is making regular shipments from his lease on the Teel & Poe property at Cooke.

Otto E. Gentz struck a large vein of \$100 ore in the Bull of the Woods mine at Hillsboro last week.

B. C. Mandell has purchased the interest of Pat Markham in the Mammoth mine at Black Mountain.

It is reported that more men are placer mining in the region of Elizabethtown this year than ever before.

The new Morris copper smelter in the Capilla mountains, is about completed and will be running on ore shortly.

S. W. Calvin and Neil B. Field have purchased a 150-acre interest in the Last Chance No. 2 claim, in the Cochiti district.

The New Mexico Dry Ore Concentrating company is making tests on the Brush Heap and Gypsy mine ores at Kingston.

The Santa Rita Copper & Iron company's mines are producing three cars of ore per day. The product is shipped to Pueblo.

Hutton Bros. have received the contract for doing 100 feet of work on the Two Sisters tunnel at Red River. The tunnel is now in 300 feet.

The Commodore claim at Cooke has been bonded to Chicago capitalists. Eight men are employed and ore is being saved for shipment.

Sheridan & Dorsey are shipping ore to the Silver City reduction works from the Telegraph mine at Telegraph. Five men are working on the property.

The 500-foot shaft on the Santa Claus at Cooke, shows a good body of iron carbonate ore. Sinking will be continued until better values are shown.

Mr. Wray shipped three tons of ore from his lease on Legal Tender hill, Silver City, to the Denning Sampling works last week. The returns were satisfactory.

The Porterfield-Parker-Harvey turquoise mines near Silver City are being examined by an expert representing an English syndicate, with the view of purchasing them.

The Bennett-Stephenson Mining company has elected the following officers: N. Raymond, president; Ph. Freudenthal, Wm. McCoy, Wm. Dessauer and M. Lohman, directors.

The old dumps of the Carrasca mine at Santa Rita are being sorted and the ore concentrated. The dumps were left by the Spaniards when the mine was worked a century ago.

The Faulkner correspondent of the Sierra County Advocate reports that there are thousands of acres of placer ground in that locality where men are making from \$1 to \$5 per day washing.

The old Lake Valley mines in New Mexico are not "played out" by any means, as so far this year they have shipped 4,000 tons of high grade ore and have several thousand tons of second class ore on the dumps.—Sierra County Advocate.

The Hillsboro mines have produced 2,920 tons of ore since January 1, 1898. The weekly tonnage now shows the various properties producing the following: Wicks mine, 10 tons; K. K., 10; Richmond, 10; Happy Jack, 5; Snake group, 50; Opportunity, 10; Sherman, 5; Prosper, 5; Rex, 5.

If there is a history of weak lungs in your family, take Scott's Emulsion.

It nourishes and invigorates.

It enables you to resist the disease. Even if your lungs are already affected, and if besides the cough you have fever and emaciation, there is still a strong probability of a cure.

The oil in the Emulsion feeds; the hypophosphites give power to the nerves; and the glycerine soothes and heals.

Monogram Note Paper.

Monogram note paper is the correct thing for private correspondence. The new Mexican Printing company furnish the latest styles of this paper at very low prices. Call and see samples.

50c and \$1.00, all druggists. SCOTT & BOWNE, Chemists, New York.

# Scrofula

Is a deep-seated blood disease which all the mineral mixtures in the world cannot cure. S.S.S. (Genuine) is a real blood remedy for blood diseases and has no equal.

Mrs. Y. T. Buck, of Delaney, Ark., had Scrofula for twenty-five years and most of the time was under the care of the doctors who could not relieve her. A specialist said he could cure her, but he filled her with arsenic and potash which almost ruined her constitution. She then took nearly every so-called blood medicine and drank them by the wholesale, but they did not reach her trouble. Some one advised her to try S.S.S., and she very soon found that she had a real blood remedy at last. She says: "After taking one dozen bottles of S.S.S. I am perfectly well, my skin is clear and healthy and I would not be in my former condition for two thousand dollars. Instead of drying up the poison in my system, like the potash and arsenic, S.S.S. drove the disease out of the skin, and I was permanently rid of it."

A Real Blood Remedy.

S.S.S. never fails to cure Scrofula, Eczema, Rheumatism, Contagious Blood Poison, or any disorder of the blood. Do not rely upon a simple tonic to cure a deep-seated blood disease, but take a real blood remedy.

Our books free upon application. Swift Specific Co., Atlanta, Ga.

The Alhambra mine in Grant county is being pumped out preparatory to resuming operations.

The Standard mine at Gold Hill has resumed operations. The property has been closed two years.

The Tom Richardson mine, on Bitter creek, Red River district, is being developed by Waco, Tex. people.

The Texas mine at Central will be equipped with a new hoisting plant. The shaft is down 300 feet.

The Franklin placer near Elizabethtown has been started up with a large force of employees on the pay roll.

Ore from the properties of the Boston M. & M. company, at La Belle, is being saved for shipment to the Albion mill at Hematite.

The Lincoln-Lucky mine at Corralitos shipped two car loads of ore to the Philadelphia Smelting & Refining company, at Pueblo last week.

The Eddy property in the Jarillas is being developed by the Jarillas and Jarillas land and mining business a specialty.

It is reported that Mr. Meyers, of the T box ranch, located near Santa Rita, last week made a discovery which showed \$18 in gold and 40 ounces in silver.

L. S. Preston, surveyor for the Maxwell Land Grant company, is collecting the mineral display from Colfax county for exhibition at the Transmississippi exposition.

The Aztec Mining company, operated at Aztec, is pushing the work of exploration with 12 miners. The properties of the company are considered the best turquoise mines in the territory.

The secretary of the Mary Mining & Smelting company has caused the publication of a notice advising the public of the discharge of R. Y. Anderson, formerly connected with that company.

H. M. Gillig has purchased the properties of the Treasure Mining company at Pecos. The purchase includes the Atlantic and Deep Down claims and a concentrating plant. The property is developed to a depth of 450 feet.

There is not much noise being made about it, but it is a fact nevertheless, that large quantities of gold are being taken from the San Juan river placers below Bluff. And it weighs \$17.50 to the ounce, that amount being paid for it at the Durango banks.—Montezuma Journal.

Wm. Kief is sinking on the Clara K property at Cooke. The shafts have attained 90 and 120 feet depths respectively, and drifts run from the bottoms disclose numerous stringers of ore. It is expected that depth will show the stringers merging into a permanent body of mineral of sufficient magnitude to warrant extensive operations.

Concerning the Othello and Desdemona mines at Cooke, the Silver City Enterprise says: "On the properties the Kansas City Smelting and Refining Company of El Paso, has a force of eighty miners employed. Fifty tons of ore is the regular daily shipment. In addition to the great ore reserves heretofore developed in these mines a new and apparently very extensive body of ore was encountered, in the work of exploitation, on Monday. This property has, during the past two years produced enormous quantities of rich lead carbonate ore. Wm. Kief, the bonanza king of the camp, leased the property about three years ago and made a fortune of about a quarter million dollars, beside paying the company a very large sum in royalties. He worked one hundred men upon one enormous ore body for over a year but did not exhaust it, as the company has been shipping fifty tons per day regularly since the property reverted to the owners at the expiration of the lease one year ago. This new strike insures a large production for years to come."

Says the Bland Herald: The heavy excavations for the big Albemarle mill are now rapidly nearing completion and it will not be long before setting of the steel shell and machinery is begun. Several large tanks have been erected on the Delphino, which adjoins the Albemarle, to hold the water brought by pipe from Peralta canon for the mill. The mine work at present consists of developing the several claims and other parts of the mine, as well as straightening the main shaft, which will change it from an incline to a vertical one 30 feet north of the present opening. A great many visitors from the outside have been to see the enormous operations at the Albemarle during the week past and all are satisfied that it is the greatest mine work ever carried on in New Mexico. The Cochiti Gold Mining company is sparing no expense in developing their big property. The large force at work there is well pleased with the management, which consists of gentlemen who are thoroughly acquainted with the work in hand and the proper handling of men.

## SOCIETIES.

Masonic Lodge No. 1, A. F. & A. M. Regular communication first Monday in each month at Masonic Hall at 7:30 p. m. P. S. DAVIS, W. M. J. B. BRADY, Secretary.

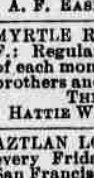

Santa Fe Chapter No. 1, R. A. M. Regular convocation second Monday in each month at Masonic Hall at 7:30 p. m. JAMES D. BRADY, H. P. ANTHONY SHELIMAN, Secretary.

Santa Fe Commandery No. 1, K. T. Regular convocation fourth Monday in each month at Masonic Hall at 7:30 p. m. MAX. FROST, E. C. ADDISON WALKER, Recorder.

Paradise Lodge No. 2, I. O. O. F. meets every Thursday evening at Odd Fellows' hall. W. STEVENS, Recording Secretary.

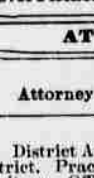

Centennial Encampment No. 3, I. O. O. F. Regular communication the second and fourth Tuesday of each month at Odd Fellows' hall; visiting patriots welcome. THOS. A. GOODWIN, C. P. A. F. EASLEY, Scribe.

Myrtle Rebekah Lodge No. 9, I. O. O. F. Regular meeting first and third Tuesday of each month at Odd Fellows' hall. Visiting brothers and sisters welcome. THURSDAY NEWHALL, Noble Grand. HATTIE WAGNER, Secretary.

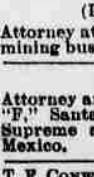

Aztec Lodge No. 3, I. O. O. F. meets every Friday evening in Odd Fellows' hall, San Francisco street. Visiting brothers welcome. NATE GOLDSON, N. G. A. F. EASLEY, Secretary.

Santa Fe Lodge No. 2, K. of P. Regular meeting every Tuesday evening at 7:30 o'clock at Castle hall. Visiting knights given a cordial welcome. ROBERT H. BOWLER, Chancellor Commander. LEE MUEHLSTEIN, K. of R. and S.

Professional Cards. DENTISTS. D. W. MANLEY, Dentist, Office, Southwest Corner of Plaza, over Fischer's Drug Store.

Attorneys at Law. MAX. FROST, Attorney at Law, Santa Fe, New Mexico. CHAS. A. SPIESS, District Attorney for the First Judicial District. Practices in all the courts of the Territory. Office—Griffin Block, Santa Fe, N. M.

GEO. W. KNABBS, Office in Griffin Block. Collections and searching titles a specialty. EDWARD L. BARTLETT, Lawyer, Santa Fe, New Mexico. Office in Catron Block.

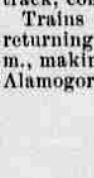

CHAS. F. EASLEY, (Late Surveyor General). Attorney at Law, Santa Fe, N. M. Land and mining business a specialty. E. A. FISKE, Attorney and Counselor at Law, P. O. Box 17, Santa Fe, New Mexico. Practices in Supreme and all District Courts of New Mexico.

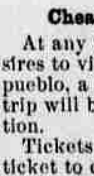

T. F. CONWAY, W. A. HAWKINS, CONWAY & HAWKINS, Attorneys and Counselors at Law, Silver City, New Mexico. Prompt attention given to all business entrusted to our care.

A. B. RENEHAN, Attorney at Law, Practices in all Territorial Courts, Commissioner Court of Claims. Collections and title searching. Rooms 5 and Spiegelberg Block.

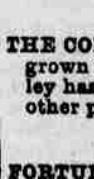

INSURANCE. S. E. LANKARD, Insurance Agent, Office: Griffin Building, Palace avenue. Represents the largest companies doing business in the territory of New Mexico, in both life, fire and accident insurance.

The New Mexico Railway & Coal Co. CONSTRUCTING The El Paso & Northeastern R'y AND The El Paso & Northeastern R. R.

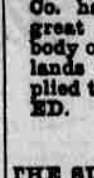

To accommodate the public will carry freight and passengers on its construction trains to and from the end of its track, commencing April 15. Trains leave El Paso at 1 p. m. and return to El Paso in track at 7:30 p. m., making connection with stages to Alamogordo, La Luz and Tularosa. A. S. GREIG, General Superintendent.

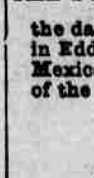

Cheap Rate to Indian Pueblo. At any time a party of five or more desires to visit the San Ildefonso Indian pueblo, a rate of one fare for the round trip will be made to the Rio Grande station. Tickets limited to date of sale and one ticket to cover entire party. T. J. HELM, General Agent, R. G. & S. F. F. R.

THE SEVENTH Beet Sugar factory in the United States was erected at Eddy, New Mexico, in 1896, and made its first campaign, beginning November 16th, 1896, and closing February 15th, 1897.

THE CONTENT OF "SUGAR in the beet" of the crop grown in the Eddy and Roswell sections of the valley has proven to be more uniformly high than any other part of the United States.

FORTUNATELY the land is blessed with just the fertility to produce high grade beets, and MORE FORTUNATELY the Pecos Irrigation and Improvement Co. and the Roswell Land and Water Co. have an irrigation system of great magnitude, covering a vast body of the BEST SUGAR BEET lands on earth. The water is applied to the crop WHEN NEEDED.

THE SUN SHINES more hours in the day and more days in the year in Eddy and Chaves counties, New Mexico, than in any other section of the west.

# The Palace Hotel- WM. VAUGHN, Prop.

FRANK HUDSON, Clerk.
